

About Bay-Delta Live

Bay-Delta Live (BDL) is a data hub of information needed in understanding the dynamic ecosystem known as the Sacramento - San Joaquin Delta.

BDL is committed to:

- Free public access
- Data collaboration
- Open and transparent sharing

Join & Share

Join the www.BayDeltaLive.com community and share your data and stories.

Sign up for push notifications and receive news on new data sets and reports.

Be a part of the richest data hub and online community in the Sacramento-San Joaquin Delta.

The richest trove of Delta data is at your fingertips through the web or iPhone application.

Real-time data is continuously updated, giving you quick and easy access to Delta conditions.

Bay-Delta Live's purpose is to expand access to data.

As a member of the BDL community you can view data from multiple sources with a set of tools such as visualizations and time series analyses to expand the knowledge and reach of Delta information.

Connect

Join the community and connect to information from multiple public agencies, scientists engaged in research, community businesses and organizations, and policymakers.

Explore

Take a virtual tour and explore all of the information available on Bay-Delta Live. Watch the demo on creating your own visualizations. Or watch the time-lapse videos of turbidity or salinity.

Share

Create your own project page and post your research results or community event. Tweet us your news and information @BayDeltaLive. Upload your photos or videos.
